The Manairco Obstruction Light is the economical way to mark airport obstructions and hazards. Proven tested design is ideal for remote locations. Weatherproof and virtually maintenance free under all service conditions. Under AC150/5345-43E, the L-810 Dual and Single obstruction lights are FAA approved.

Units utilizing the bulb change-over feature automatically switch to secondary bulb when the primary lamp burns out. This feature normally permits a three year bulb change interval.

All models come standard with a 1" threaded bottom hub, 120 volt operation and Red lens, other lens colors available
